

PEREGRINE FALCONS

POPULATION RECOVERY AND BEYOND

Speaker: Come learn about peregrine falcon recovery efforts from bird bander and conservation biologist Glenn R. Stewart, director of the University of California Santa Cruz Predatory Bird Research Group. Glenn will describe the techniques used by the Predatory Bird Research Group to achieve the peregrine falcon population recovery, discuss current studies of the recovered population that foster conservation education, and make specific comments about the Sausal Creek Watershed peregrine falcons that nest at the Fruitvale Bridge. He will be accompanied by a live peregrine falcon.

Date: Wednesday, March 21, 7:00-9:00 p.m.

Location: Dimond Library, 3565 Fruitvale Ave. (near MacArthur)

For more information: Call (510) 501-3672, visit www.sausalcreek.org, or email coordinator@sausalcreek.org
