Things to observe during our hike – please leave natural objects where you find them:

- Cones: redwood, pine
- Acorns: tanbark oak, other oak
- A seed from a different plant (maple, berry, or other)
- Make observations about plant adaptations for different pollinators (different size/shape/color flowers, etc.)
- Leaves: redwood, pine, tanbark, other – make observations about differences in surface area for photosynthesis (how does the amount of light available influence the leaf surface area?)
- A feather
- Something round
- Something fuzzy
- Something sharp
- Something that you consider beautiful
- Something that you consider interesting (be prepared to explain why)
- A leaf that has been chewed on (not by a person)
- Pick up two pieces of litter
